Quality and unique design are the hallmarks of these high-fashion bags and accessories, created in Italy of regenerated leather. Available in a variety of sizes and colors, this elegant line works well for business or leisure and is priced to appeal to a broad range of consumers.

The regenerated or recycled leather is obtained from scraps of leather, grounded up and pressed with the addition of natural rubber (averaging 80% leather). The new material is then coated for protection and coloring.

Regenerated leather is one of the most environmentally friendly materials. It is produced of genuine leather scraps and natural, renewable raw materials such as natural latex, natural fat, natural tanning agents. 95% of the material are renewable, natural substances. The recycling of the leather waste is a big contribution to the environmental protection and to the discharge of the waste disposal sites.

The "Spectro" coating is a pure aqueous based finish, without solvents. Spray and exhaust coming out the machines when running this finish are neutralized residue-free in one of the most modern, thermal air cleaning units.
